

Shay's Rebellion

During Shay's Rebellion, which took place in the late 1700s in Massachusetts, farmers were struggling with debt and the government was seizing their land because they couldn't pay their taxes. Led by Daniel Shays, a former soldier, the farmers rebelled against the government. They were angry about high taxes and wanted help with their debts. The rebellion included protests and even some fighting. It showed that there were problems with the government at that time and led to changes in how the country was governed.
